ISF-3 Young, 19-20th November 2019, Hiroshima, Japan

		411
	List of Poster Presentation	
Poster 1	Photocathodes for Photocatalytic Hydrogen Generation Using a Molecular Cobalt Catalyst and a Push-Pull Dye	Kelly Materna
Poster 2	Combining Molecular Efficiency with Surface Stability	Nicola Weder
Poster 3	Structural Basis of Excitation-Energy-Transfer Mechanisms in Diatom Photosystem II-FCP Supercomplex: Evolution of Light-Harvesting Complexes in Oxyphototrophs	Ryo Nagao
Poster 4	Ultrafast UV-Vis and Infrared Characterization of a High Performing Water Oxidation Ru-Catalyst on TiO ₂	Belinda Pettersson Rimgard
Poster 5	An Electron Extraction Layer Modified Amorphous Silicon Photocathode for Stable Alkaline Water Reduction	Doudou Zhang
Poster 6	Preparation, Flow-Ability and Reactivity of Spherical Ceria Particles for High–Temperature Thermochemical Two-Step Water Ssplitting Cycle	Shota Watanabe
Poster 7	Enhanced Activity and Selectivity in the Photocatalytic Reduction of CO ₂ by Use of Macrocyclic vs Acyclic Tetrametallic 3d-4f Catalysts	Sriram Sundaresan
Poster 8	Photocatalytic Water Oxidation Using Nitrogen/Fluorine Codoped Rutile Titania	Akinobu Miyoshi
Poster 9	Properties Controlling the Catalytic Activity of Hydrogen Evolution from PFBT Based Polymer Dots	Martin Axelsson
Poster 10	Hierarchical Micro-Reactor as Electrodes for Water Splitting by Metal Rod Tipped Carbon Nanocapsule Self-Assembly in Carbonized Wood Epitaxial Construction and Electrochemical Analysis of Redox Active MOFs	Xia Sheng Brian McCarthy
Poster 11 Poster 12	A Stable Monolithic Photoelectrochemical Device Evolving Hydrogen from Water Vapor	Tobias Kistler
Poster 12 Poster 13	BiVO4 Based Photoanode for Tandem Solar Energy Harvesting and Utilization	Jin Hyun Kim
Poster 13	Water Oxidation with First Row Metal Complexes: Looking for the Real Catalyst	Primavera Pelosin
Poster 15	Improving Photoelectrochemical Performance of BiVO ₄ Photoanodes by Facile Postsynthetic Treatment and Cocatalyst Modification	Biaobiao Zhang
Poster 16	Nitrogen-Doped Carbon Quantum Dots embedded Polymer Dots as Metal-free Photocatalysts for Visible-Light-Driven Hydrogen Evolution	Mohamed Hammad Elsayed
Poster 17	Canceled	wonameu nammau Lisayeu
Poster 18	Photocatalytic Water Splitting Using Intermetallic Compound Mg _{1.x} Al _x B ₂ as Co-Catalysts.	Yuka Imada
Poster 19	Role of Valine 185 in the Oxygen-Evolving Complex of Photosystem II Revealed by QM/MM Calculations	Mitsuo Shoji
Poster 20	A Core-Shell NiO-Dye-TiO ₂ (ZnO) Film for Solar Energy Conversion: From Mechanism to Application	Lei Tian
Poster 21	Introducing Pressure Dependence as a Mechanistic Tool for Proton Coupled Electron Transfer Reactions	Robin Tyburski
	In Situ Imaging of the Local pH in Gas Diffusion Electrodes for CO ₂ Reduction	Alex Welch
Poster 22 Poster 23		
Poster 23 Poster 24	Towards a Novel Artificial Cytochrome B5 Complex with Water Oxidation Activity Metabolic Engineering of Cyanobacteria for Cinnamic Acid Production	Laura Opdam Kateryna Kukil
Poster 24 Poster 25	A New RuCo Dyad for Dye-Sensitized Hydrogen-Evolving Photocathode Applications	Emmanouil Giannoudis
Poster 26	Synthesis of sedimental porphyrin-like chlorophyll-a derivative lacking the 3-substituent	Marie Doi
Poster 27	Light Absorption Properties and Electronic Band Structures of Lead-Vanadium Oxyhalide Apatites $Pb_{s}(VO_{d})_{3}X$ (X = F, Cl, Br, I)	Masashi Nakamura
Poster 28	Investigating Kinetic and Thermodynamic Factors for Selective CO ₂ Reduction at Metal Hydrides	Bianca Ceballos
Poster 29	Synthesis of Zinc Bacteriochlorophyll-d Analogues Bearing an Oxime Group at the 13 ⁴ -Position and Their Self-aggregation	Airi Katayama
Poster 30	Reconstitution of Bacteriochlorophyll B into LH2 Protein from the Purple Photosynthetic Bacterium Rhodoblastus Acidophilus	Madoka Yamashita
Poster 31	Self-Assembly and Hydrogel Formation of Dipeptide-Chromophore Hybrids	Vasilis Nikolaou Koichi Miyagawa
Poster 32 Poster 33	Domain-Based Local Pair Natural Orbital Coupled Cluster Calculation for Ten Different S0 State Structures of the Oxygen Evolving Complex of Photosystem II: Possibility of Valence Fluctuation Synthesis of Chiral <i>N</i> -methylated Chlorophyll- <i>a</i> Derivatives and Their Optical Properties	Yuki Kawamoto
Poster 33 Poster 34	Synthesis of Boronates of Dihydroxy-Bacteriochlorins and Their Qy Bands at Far-Red Region	Daichi Funakoshi
Poster 34 Poster 35	Pigment Analysis of LH2 Protein Reconstituted with Chlorophyll b by In Situ Reduction Using Synthetic Chlorophyll Derivatives	Shiori Nakagawa
Poster 36	A Durable Photocatalytic System Utilizing Two Kinds of Immiscible Solvents	Kazuki Kita
Poster 37	Self-Assembly Studies and Hydrogen Evolution Measurements Based on Peptide-Chromophore Hybrids	Athanassios Coutsolelos
Poster 38	Photoelectrochemical H ₂ Evolution from a Covalent Porphyrin-Cobalt Diimine-Dioxime Dyad	Asterios Charisiadis
Poster 39	Efficient Light-Driven Hydrogen Evolution Using a Thiosemicarbazone-Nickel (II) Complex	Georgios Charalambidis
Poster 40	High Stability of Ir(OH) ₃ Supported on a Bottom-Up Mesoporous Al-SiO ₂ Nanoparticles Assembly for Photocatalytic Water Splitting	Gentarou Sakamoto
Poster 41	Photochemical and Electrochemical Water Oxidation Reaction Catalyzed by a Dinuclear Cobalt-Hexaphyrin Complex	Takashi Nakazono
Poster 42	Photocatalytic CO ₂ Reduction Using Iron Complex Mixed with Bulky Phenanthroline Ligands	Hiroyuki Takeda
Poster 42 Poster 43	Roles of Red-Chlorophylls in Light-Harvesting of Cynanobacterial PSI, as Revealed by Ultrafast Spectroscopy	Daisuke Kosumi
Poster 43 Poster 44	Stable Water Oxidation on Oxyfluoride $Pb_2Ti_2O_{54}F_{1,2}$ Photoanode Under Sun-Light	Naoki Hirayama
	Understanding the Effect of Oxygen Vacancies and Palladium Co-Catalyst Addition on the Photoelectrochemical Performance of WO3 Photoanodes	Anna Wilson
Doctor 15		
Poster 45 Poster 46	Incorporating Heteroatoms into Elugrene-type Conjugated Polymers for Enhanced Photocatalytic Hydrogen Production	
Poster 46	Incorporating Heteroatoms into Fluorene-type Conjugated Polymers for Enhanced Photocatalytic Hydrogen Production Energy Transport in the Phycobilisome-Photosystem Supercomplex from Thermophilic Cyanobacteria	Yang Bai Yuma Hirota
Poster 46 Poster 47	Energy Transport in the Phycobilisome-Photosystem Supercomplex from Thermophilic Cyanobacteria	Yuma Hirota
Poster 46 Poster 47 Poster 48	Energy Transport in the Phycobilisome-Photosystem Supercomplex from Thermophilic Cyanobacteria Energy-Transfer Dynamics Between Ruthenium(II) and Osmium(II) Complexes Codoped in Ionic Nanospheres Toward Artificial Light-Harvesting System	Yuma Hirota Hayata Yamamoto
Poster 46 Poster 47 Poster 48 Poster 49	Energy Transport in the Phycobilisome-Photosystem Supercomplex from Thermophilic Cyanobacteria Energy-Transfer Dynamics Between Ruthenium(II) and Osmium(II) Complexes Codoped in Ionic Nanospheres Toward Artificial Light-Harvesting System Immobilization of Enzymes in a Bottom-Up Mesoporous Silica Nanoparticles Assembly to Enhance Catalytic Activity and Recyclability	Yuma Hirota Hayata Yamamoto Hiroyuki Oshima
Poster 46 Poster 47 Poster 48 Poster 49 Poster 50	Energy Transport in the Phycobilisome-Photosystem Supercomplex from Thermophilic Cyanobacteria Energy-Transfer Dynamics Between Ruthenium(II) and Osmium(II) Complexes Codoped in Ionic Nanospheres Toward Artificial Light-Harvesting System Immobilization of Enzymes in a Bottom-Up Mesoporous Silica Nanoparticles Assembly to Enhance Catalytic Activity and Recyclability Visible-Light H ₂ Evolution Over Layered K ₂ LaTa ₂ O ₆ N Photocatalyst Prepared from KLaTa ₂ O ₇ with Different Sizes	Yuma Hirota Hayata Yamamoto Hiroyuki Oshima Hiroto Mogi
Poster 46 Poster 47 Poster 48 Poster 49 Poster 50 Poster 51	Energy Transport in the Phycobilisome-Photosystem Supercomplex from Thermophilic Cyanobacteria Energy-Transfer Dynamics Between Ruthenium(II) and Osmium(II) Complexes Codoped in Ionic Nanospheres Toward Artificial Light-Harvesting System Immobilization of Enzymes in a Bottom-Up Mesoporous Silica Nanoparticles Assembly to Enhance Catalytic Activity and Recyclability Visible-Light H ₂ Evolution Over Layered K ₂ LaTa ₂ O ₆ N Photocatalyst Prepared from KLaTa ₂ O ₇ with Different Sizes Photoelectrochemical CO2 Reduction in Water Using Poly-Pyrrole Based Ruthenium Supramolecular Photocathodes	Yuma Hirota Hayata Yamamoto Hiroyuki Oshima Hiroto Mogi Fazalurahman Kuttassery
Poster 46 Poster 47 Poster 48 Poster 49 Poster 50 Poster 51 Poster 52	Energy Transport in the Phycobilisome-Photosystem Supercomplex from Thermophilic Cyanobacteria Energy-Transfer Dynamics Between Ruthenium(II) and Osmium(II) Complexes Codoped in Ionic Nanospheres Toward Artificial Light-Harvesting System Immobilization of Enzymes in a Bottom-Up Mesoporous Silica Nanoparticles Assembly to Enhance Catalytic Activity and Recyclability Visible-Light H ₂ Evolution Over Layered K ₂ LaTa ₂ O ₆ N Photocatalyst Prepared from KLaTa ₂ O ₇ with Different Sizes Photoelectrochemical CO2 Reduction in Water Using Poly-Pyrrole Based Ruthenium Supramolecular Photocathodes Development of Thin Boron-Doped Diamond Electrodes for (Photo)Electrochemical Systems	Yuma Hirota Hayata Yamamoto Hiroyuki Oshima Hiroto Mogi
Poster 46 Poster 47 Poster 48 Poster 49 Poster 50 Poster 51	Energy Transport in the Phycobilisome-Photosystem Supercomplex from Thermophilic Cyanobacteria Energy-Transfer Dynamics Between Ruthenium(II) and Osmium(II) Complexes Codoped in Ionic Nanospheres Toward Artificial Light-Harvesting System Immobilization of Enzymes in a Bottom-Up Mesoporous Silica Nanoparticles Assembly to Enhance Catalytic Activity and Recyclability Visible-Light H ₂ Evolution Over Layered K ₂ LaTa ₂ O ₆ N Photocatalyst Prepared from KLaTa ₂ O ₇ with Different Sizes Photoelectrochemical CO2 Reduction in Water Using Poly-Pyrrole Based Ruthenium Supramolecular Photocathodes	Yuma Hirota Hayata Yamamoto Hiroyuki Oshima Hiroto Mogi Fazalurahman Kuttassery Petr Ashcheulov
